4 March 1991

MEMORANDUM

From: N4
To: 00
Via: 01

Subj: GLENWOOD PARK CIVIC CLUB

Admiral -

Great thanks

In response to your comments, we do not have any indications that nuclear wastes were buried at either of the landfills briefed to the civic club. One landfill was used for all solid wastes generated on the base from the 1940's to the mid-1970's; the other was used for construction debris from 1974 until 1981. As stated in the memo, if they're willing to show us the location where this stuff was buried, we'll be glad to look for it.

Enclosure (1) was distributed to the attendees at the meeting; the site summaries in enclosure (2) were made available to anyone interested. A more detailed briefing on these sites and our installation restoration program is scheduled for you for 26 March.

Very respectfully,

Cheryl
